DETAILED ACTION

Examiner's Statement of Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or make obvious the independent claims 13 and 15 which claim a dishwasher comprising: a least one washing container; a system for recognition of a fluid level of a rinsing fluid contained in the dishwasher, the fluid level recognition system having at least one capacitive filling level sensor having at least two probes, forming two capacitor plates, each operatively coupled to a sensor surface and projecting into the washing container for operative contact with the rinsing fluid, thereby using the rinsing fluid as a dielectric having a dielectric constant that changes the with the fill level of the rinsing fluid, wherein at a first fill level the probes and the rinsing fluid form a capacitor having a first capacitance value indicating a first fill level and causing the filling level sensor to sense the first fill level and at a second fill level the probes and the rinsing fluid form a capacitor having a second capacitance value indicating a second fill level and causing the filling level sensor to sense the second fill level wherein a number of capacitive filling level sensors are provided.

The closest prior art of record is that of U.S. Patent No. 3,539,153 to Wennerberg et al. (Wennerberg). Wennerberg teaches a dishwasher with a chamber for the dishes, with a washing, rinsing and drying steps, with a cleaning agent dispenser and a fluid carrier, with capacitance fluid level sensors a circuit connected to the sensor.

Wennerberg does not teach a sensor with two probes (multiple rinsing fluid level sensing capabilities) with capacitor plates coupled to said sensor

One of ordinary skill in the art realizes the contributions of the current invention: with a sensor that has multiple rinsing fluid level sensing capabilities different fluid levels may be established thereby tailoring the operative cycle to the desired needs of user to thereby insure adequate cleansing of the ware within.

Since claims 13 and 15 are allowed, claims 12, 14, and 16-27 which depend thereon are also allowed.
